Related Info:

The seminar is an excellent opportunity to accumulate CEUs or PDHs. This seminar will provide 14 continuing education credits.

Participants will receive a training packet, related lecture notes, breakfast and lunch both days, and a certificate of completion for the course.

Topic:

TVSFPE will host on April 26 and 27th, 2012, a two-day course on the installation and inspection of UL listed firestopping systems for various applications. Fire barriers are an integral part of fire protection. This course will give attendees the knowledge maintain the integrity of facility fire barriers with systems listed by UL which is a nationally recognized testing laboratory accepted by most jurisdictions.

Description:

This comprehensive, competency-based course is designed to educate and train participants in the fundamentals needed to become a resident firestop specialist. The goal is to equip the participant with the knowledge and tools needed to return home as a qualified installer and inspector, and to serve as a resident expert in confirming whether or not firestop installations are code compliant.

Objectives:

- 1) Containment in construction
- 2) History of firestop
- 3) How firestop works
- 4) How firestop is tested
- 5) Where firestop is required
- 6) Myths about firestop
- 7) Product selection
- 8) Installation
- 9) Inspecting for compliance
- 10) UL® System approach
- 11) UL® System Group exercises
