## 2013 Annual Seminar

## 2009 IBC Performing Nonstructural Plan Review

Presented by  
The International Code Council (ICC)

April 18<sup>th</sup> & 19<sup>th</sup>, 2013  
Knoxville, Tennessee

website: [www.tvsfpe.org](http://www.tvsfpe.org)

## Speaker: Terrill Stripling, ICC

### Related Info:

The seminar is an excellent opportunity to accumulate CEUs or PDHs. This seminar will provide 12 continuing education credits.

Participants will receive a training packet, related lecture notes, breakfast and lunch both days, and a certificate of completion for the course.

### Topic:

TVSFPE will host an International Code Council (ICC) Seminar on April 18<sup>th</sup> and 19<sup>th</sup>, 2013. The seminar is a two-day course that will help participants to successfully review nonstructural construction documents.

### Description:

This seminar will be based on the 2009 International Building Code (IBC) because a 2012 based course is not yet available.

Although based on the 2009 IBC, the course is intended to teach the individual the techniques and strategies of Plans Review and will include a universal approach appropriate to any code set.

This seminar will help you learn how to perform nonstructural plan review tasks that are consistent with the requirements in the 2009 IBC. When completed, this workshop will aid in determining whether a given set of building plans complies with the outlined requirements of the code.

The topics covered in this course are not all inclusive. Selected topics that mirror the plan review record are included and additional topics applicable to most construction projects are covered. Prior to performing any part of a nonstructural plan review, the plan review should read all provisions of the required chapters and determine the applicability of the provisions on a project-by-project basis.

### Objectives:

Upon completion of this seminar, participants will be able to determine that building planning:

- Complies with applicable standards for construction
- Specifies use of appropriate materials and methods
- Is providing an environment that is safe for people and property
- Complies with the applicable IBC minimum requirements
- Perform a review of fire-resistance rated construction
- Perform a fire protection systems review
- Perform a means of egress review

### Outline:

**Day 1:** Thursday, April 18<sup>th</sup>, 2013

8:00 AM – Welcome/Introduction

8:15 AM – Presentation

Noon – Lunch

1:00 PM – Presentation

3:00 PM – Day 1 Wrap up
